

DENTAL VISIT SUMMARY

Routine Checkup Notes

Patient: Carl Dillon

Appointment Type: Preventive Dental Examination

Visit Status: Completed

Next Recommended Visit: Six Months

EXAMINATION SUMMARY

• Overall oral health appears satisfactory. • Mild plaque accumulation observed along the lower molars. • No cavities detected during examination. • Gum tissue generally healthy with minor areas of sensitivity. • Existing fillings remain stable. • Bite alignment showed no significant changes.

DOCTOR RECOMMENDATIONS

Dentist: Dr. Anna Svensson, DDS

Recommendations:

• Continue brushing teeth twice daily. • Increase flossing frequency to once every evening. • Use fluoride toothpaste regularly. • Reduce intake of sugary beverages and snacks. • Replace toothbrush every three months. • Schedule professional cleaning at the next routine visit.

AREAS TO MONITOR

• Mild gum sensitivity around upper premolars. • Monitor occasional sensitivity to cold drinks. • Maintain consistent oral hygiene habits.

DAILY ORAL HYGIENE CHECKLIST

Morning

- ☐ Brush teeth for two minutes
- ☐ Use fluoride toothpaste
- ☐ Rinse with water

Afternoon

- ☐ Avoid excessive sugary snacks
- ☐ Drink sufficient water

Evening

- ☐ Brush teeth thoroughly
 - ☐ Floss between all teeth
 - ☐ Use alcohol-free mouthwash
-

FLOSSING INSTRUCTIONS

1. Use approximately 18 inches of dental floss.
 2. Wrap the ends around the index fingers.
 3. Gently guide the floss between teeth.
 4. Form a "C" shape around each tooth.
 5. Move the floss upward and downward carefully.
 6. Repeat for all tooth surfaces.
-

ADDITIONAL NOTES

- Maintain regular six-month dental examinations.
 - Report prolonged tooth sensitivity if symptoms worsen.
 - Continue preventive oral care practices.
-
